

Medication-Assisted Treatment Approaches for Alcohol and Opioid Use Disorder (MAT)

Sponsored By:

LA County Department of Public Health, Substance Abuse Prevention and Control
(SAPC) California Department of Health Care Services
California Institute for Behavioral Health Solutions
UCLA Integrated Substance Abuse Programs
Pacific Southwest Addiction Technology Transfer Center

Date and Time:	Thursday, April 15, 2021; 9:00am-12:15pm The training will begin promptly at 9:00 am. Please try to log in 10-15 minutes prior to the training to ensure your audio and visual connections are working properly.
Registration Information:	Pre-Registration is required! Register at: https://ucla.zoom.us/meeting/register/tJwrf-GsqDkjE9GVuUdFXaBslXwP1f0qolNX You will receive a confirmation email with a unique Zoom link upon registration. Please do not share your unique Zoom link.
Who Should Attend:	This three-hour live virtual training is free and is open to providers including: <ul style="list-style-type: none">• Psychologists• LMFTs and LCSWs• Registered Nurses• Certified Substance Use Disorder Treatment Counselors• Other Behavioral Health Specialists/Clinicians
Training Description and Core Clinical Components:	The purpose of this three hour live interactive training is to provide participants with a detailed overview of medications that have been shown to be effective as a component of the treatment of alcohol and opioid use disorders. Topics will include: the context for medication assisted treatment (positive and negative perceptions), the epidemiology of alcohol and opioid use and dependence (user demographics), a review of the various classes of opioids, an overview of each medication, its indication, to whom it is administered, and how it works, and treatment settings for medication-assisted treatment. Medications will include: acamprosate, disulfiram, naltrexone, methadone, and buprenorphine. The training will conclude with a session on talking to clients about their use of medications, and strategies to address health disparities through increased access to medication-assisted treatment. Time will be provided throughout the training for discussion and questions.

Learning Objectives:	<p>At the conclusion of the training, participants will be able to:</p> <ol style="list-style-type: none"> 1. Propose at least three (3) acute and chronic effects of alcohol, heroin, and other opioids. 2. Identify the prevalence of and at least three (3) key populations impacted by alcohol and opioid use disorders. 3. Specify three (3) medications that are available to treat alcohol and opioid use disorders. 4. Apply at least two (2) strategies that can be used to address health disparities through increased access to medication-assisted treatment. 5. Determine and describe the mechanism of action of one (1) medication that can reverse overdose in individuals who use opioids.
Trainer:	Grant Hovik, MA, UCLA Integrated Substance Abuse Programs
